Що Ви знаєте про сучасні місця для відпочинку? Вам буде дуже цікаво дізнатися, що про ці прекрасні місця Ви ще не чули!

Tired of the routine? Want memorable, striking or even spicy impressions? I offer you a list of hotels, restaurants and bars, where you certainly won't get bored.

If you are into nature, you would like these places. First, Yellow Tree House, is a little restaurant in the trees at a height of 60 meters. It's building looks more like an onion or a butterfly doll and is situated in New Zealand.

Second is the Montaña Mágica Lodge, "magic mountain lodge", and it will for sure change your idea of a hotel. People call it "hotel-volcano" because the building is cone-shaped, out of stone and wood, looks really like a fire spewing mountain. Only instead of lava, there is a jet of water coming out. This hotel is situated nearby the Arenal Volcano.

Still not impressed? And what about deep water? Do you want to have lunch in the company of marine inhabitants? Ithaa Restaurant, Maldives, – first underwater restaurant in the world is at a depth of 5 meters.

If you don't like depth, I would like to offer you to rise at a height of 50 meters with restaurant "Dinner in the sky". Special crane can lift into the sky staff and 22 guests. Safety is on the first place, so you will be tied up with 4 belts.

Are you warmed up? Let's cool down together in Lumi Linna Snow Castle – the biggest snow castle in the world, which is located in a small Finnish town of Kemi. Every year a chapel, restaurant and hotel are building from ice and snow, but their style of construction, proportions and shapes change with each season.

As you can see, there are lots of variants to spend your vacation and be left with memorable impressions. The choice is up to you!
