**EDUCATIONAL PRACTICE «INTRODUCTION TO THE SPECIALTY AND ACADEMIC INTEGRITY» FOR STUDENTS OF SPECIALTY 292 «INTERNATIONAL ECONOMIC RELATIONS» AND ITS EFFECTIVENESS IN THE CONTEXT OF EUROPEAN INTEGRATION**

The academic practice «Introduction to the specialty and academic integrity» is designed to prepare students for successful study and future professional work by integrating theoretical knowledge and practical skills in a globalized economic environment. The educational practice is designed for first-year students and is aimed at familiarizing them with the curricula, programs and basic requirements for the organization of the educational process of training specialists of the first (bachelor's) level of higher education in the specialty 292 «International Economic Relations». The educational practice gives an idea of the stages of historical development of international economic relations, provides an understanding of the relationship of all its components - states, intergovernmental and non-governmental organizations, transnational corporations, business entities.

The purpose of the academic practice «Introduction to the Specialty and Academic Integrity» is to form students' basic understanding of the modern system of international economic relations, key principles and mechanisms of its functioning, as well as to develop academic integrity skills, which is the basis for educational and research activities during study and professional growth in the future.

The training practice allows you to master professional competencies related to the peculiarities of higher education, teaching methods, types of classes, the ECTS assessment system and methods of working with educational literature and scientific sources in the library of the State Biotechnological University, methods of searching and processing information; studying and applying the principles of academic integrity in educational and scientific activities, in particular in the field of copyright, avoidance of plagiarism and research ethics; development of critical thinking skills, reflection and independent work on professional tasks in the field of international economic relations; broadening the understanding of the forms of international economic relations (international trade, international capital flows, international monetary, financial and credit relations, international scientific and technological exchange, international labor migration, etc.)

---

modern forms of intensification of international economic relations (free economic zones, transnational corporations), as well as determining the place and role of Ukraine in the modern system of international economic relations.

Thanks to the close cooperation between Ukraine and the EU, the Ukrainian government is implementing educational reforms, modernizing legislation, developing modern curricula, increasing the productivity of higher education institutions that provide quality educational services and training of higher education teachers to meet the needs of the European labor market, sustainable growth of job quality and development of innovations, and strengthening of European identity and active society.

Good scientific practice is based on the fundamental principles of academic integrity. The European principles are based on compliance with the norms of honesty and truthfulness in their activities, because academic integrity is the best tool for complying with these norms in the scientific field.

The principles of academic integrity and openness are the key values of the State Biotechnological University, as this approach will provide a truly modern high-quality education that will make the most competitive specialist in the future.

Considering the existing requirements, the State Biotechnological University already has its own developed system of ensuring the principles of academic integrity and ethics of academic relations, which is an important component in shaping the academic success of an educational institution and the professional competencies of specialists in professional development. Since academic integrity forms an academic culture and effective motivation for self-education and development, the ability to think critically, study topical issues of ethical relations in the context of professional activities, and develop the necessary practical skills for successful learning and future professional activities.

The effectiveness of the academic practice «Introduction to the specialty and academic integrity» for students majoring in 292 «International Economic Relations» demonstrates the ability to solve complex specialized tasks and practical problems in the field of international relations in general and international economic relations in particular, as well as in the process of learning to apply the principles of academic integrity, which involves the application of the latest theories and methods in conducting comprehensive studies of world economic relations, is characterized by complexity and uncertainty.
